

2016-2017 CMAA-SAC LUNCH & LEARN SERIES

Educational Advancement During Your Lunch Hour!

Please join CMAA-SAC for our Lunch & Learn Series. The presentations will be comparable to AIA and will help you fulfill CEUs for other organization. Attendance Certificates will be made available to all attendees.

OSHA ISSUES NEW SILICA RULES

presented by:

Amanda McKenney

Industrial Hygiene & Asbestos
Group Manager

Terracon Consultants, Inc.

Ms. McKenney is Terracon's Industrial Hygiene and Asbestos Group Manager from Birmingham, Alabama. She earned her Bachelor of Science in Environmental Health from the University of Georgia and is a Certified Industrial Hygienist (CIH). With more than 16 years of experience, Ms. McKenney has a wide variety of experience conducting asbestos surveys, lead-based paint surveys, mold surveys, indoor air quality (IAQ) assessments, hazardous materials assessments, health and safety audits and industrial hygiene surveys in various building types and industrial environments. She is a wealth of knowledge on OSHA Rules and all things Industrial Hygiene related.

Presentation Summary:

Learn about the new regulations and its potential impact on your business and your client's businesses.

On March 24, 2016, the Occupational Safety and Health Administration (OSHA) issued its final regulation to limit worker exposure to crystalline silica, amending a standard that has been in place since 1971. A business performing work that generates dust, could be subject to this regulation.

The new regulation requires employers to:

- Evaluate employee exposure to silica
- Develop an exposure control plan if the AL is exceeded
- Implement engineering controls (such as water or ventilation) to limit worker exposure
- Provide respirators when engineering controls are infeasible
- Provide medical surveillance to employees
- Implement strict housekeeping standards.
